## ICC & Quincy Aftermarket Air Compressor Replacement Parts List

QUINCY PART NUMBERS	I.C.C. PART NO.	QUINCY PART NUMBERS	I.C.C. PART NO.
------------------------	--------------------	------------------------	--------------------

**VALVE SETS** - If you need a **VSET**, please order the appropriate **VSHOK** (pages 11-13). This will give the equivalent of a **VSET**, plus the Gaskets and Diaphragms needed for the Head. Due to the many combinations of Quincy Valves used in different models and records of change, we have not put together separate **VSETS**.

### VALVE PLATES & ASSEMBLY

110939X2 ..... 2023908952	<b>VPA-9392-Q</b>	113047 001 ..... 2022125302	<b>VPA-30471-Q</b>

110370 ..... 2025045200	<b>SPG-16-Q</b>		

♦ Note: Valve Spring 7270 (**SPG-8-Q**) is the current style spring for Suction Valves, non-Press Fit and early Press Fit Discharge valves. In November 2003 Quincy redesigned the 7271X series Discharge Valve to use a longer spring 7270-2 (**SPG-8D-Q**). Kits listed in this catalog are **now** contain both the **SPG-8-Q** and the New spring (7270-2) **SPG-8D-Q** for Discharge Valves and the **SPG-8-Q** for Suction Valves. We also stock the pre 1990's version of the 7270 which we call **SPG-15-Q**

### VALVE DISCS

1552 (1552-001) ..... 2023905600	<b>DISC-1-Q</b>	7722 ..... 2023907200	<b>DISC-9-Q</b>
1552-002 ..... 2023905700	<b>DISC-1B-Q</b> §	1779 ..... 2023905900	<b>DISC-10-Q</b>

## ICC & Quincy Aftermarket Air Compressor Replacement Parts List

**MAJOR OVERHAUL KITS MOK's with Wearing Valve Parts.** These kits are based on Quincy Style Overhaul kits on the previous page. To simplify ordering parts for single machine repair, Quincy style Overhaul Kits MOK's have been assembled which include Gasket Kit, shims, Piston Pins (lock rings if used), Piston Ring Kit, Piston Pin Bushings, Insert Bearings (if used in original rods), Main Bearings, valve discs, springs, o-rings, oil seal and unloader diaphragms if required, to recondition one compressor. Kits for non-Vacuum pumps include a Solberg style air filter. Kits marked with a Ø include an oil filter element.

**VALVE SET MAJOR OVERHAUL KITS VSMOK's with Complete Replacement Valves.**

VSMOK's have been assembled which include all parts in MOK's, with Complete Replacement Valves instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required.

**IMPORTANT PISTON RING NOTES:** Quincy has used two styles of Piston Rings on these machines. Most of the old machines were sold with Taper Faced Compression Rings, the newer machines were sold with Side Sealed Compression Rings. Side Sealed rings do a better job, especially on a worn cylinder. We are now including them as standard in all kits (unless noted). However, Taper Face rings are easier to install, and we are offering them as an option on most of the kits. Insert the letter "T" before the "Q" in the MOK part number for Taper Face rings.

*Kits marked with a "B" are available with Oversize Rings Taper Face- please call*

**UNDERSIZE BEARING KITS** If you want any of the kits assembled with Undersize Bearings, insert the letter "U" before the "Q" in the MOK part number for .010 Undersize Bearings, or insert the letter "W" before the "Q" for .020 Undersize Bearings.

## ICC & Quincy Aftermarket Air Compressor Replacement Parts List

### TUNE UP KITS TUK's with *Wearing Valve Parts. & Standard Size Piston Rings*

To simplify ordering parts for single machine repair, TUK's have been assembled which include Gasket Kit, shims, Piston Ring Kit, insert bearings (if used in original rods), valve discs, springs, o-rings, oil seal and unloader diaphragms if required, to recondition one compressor. Please order the correct filter element in the listing the AIR & OIL FILTER Section.

### VALVE SET TUNE UP KITS VSTUK's with *Complete Replacement Valves.*

VSTUK's have been assembled which include all parts in TUK's, with Complete Replacement Valves (current style) instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required.

**IMPORTANT PISTON RING NOTES:** Quincy has used two styles of Piston Rings on these machines. Most of the old machines were sold with Taper Faced Compression Rings, the newer machines were sold with Side Sealed Compression Rings. Side Sealed rings do a better job, especially on a worn cylinder. We are now including them as standard in all kits (unless noted). However, Taper Face rings are easier to install, and we are offering them as an option on most of the kits. Insert the letter "T" before the "Q" in the TUK part number for Taper Face rings.

Kits marked with a "B" are available with Oversize Rings Taper Face- please call

**UNDERSIZE BEARING KITS** If you want any of the kits assembled with Undersize Bearings, insert the letter "U" before the "Q" in the TUK part number for .010 Undersize Bearings, or insert the letter "W" before the "Q" for .020 Undersize Bearings.

## ICC & Quincy Aftermarket Air Compressor Replacement Parts List

### HEAD OVERHAUL KITS HOK's with Wearing Valve Parts.

To simplify ordering parts for single machine valve and cylinder head repair, HEAD OVERHAUL KITS have been assembled with all necessary valve discs, valve springs, unloader diaphragms if required, valve seat gaskets, valve cover gaskets, and head gaskets to recondition valves for one compressor. Please order the correct filter element from the listing in the AIR & OIL FILTER Section.

### VALVE SET HEAD OVERHAUL KITS VSHOK's with Complete Replacement Valves.

VSHOK's have been assembled which include all parts in HOK's, with Complete Replacement Valves (current style) instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required.
