September 23, 2016

Dear Customer

It has been more than 5 years since we updated our catalog of Air Compressor Replacement Parts and Accessories. Our catalog 122 has hundreds of new parts and accessories. Currently we have completed the Ingersoll Rand, Quincy, LeRoi-Dresser - Westinghouse, Champion and Accessories sections of the catalog. We plan to have the other sections completed by the end of this year. Note that we have modified the layout of all new catalog sections. The Body of the catalog lists the Parts, followed by Indexes with current selling prices, and list prices if we have them. Quantity discounts are indicated by a Letter Code, every Index page shows a legend to these codes. [In addition, we have a list of filters that we know listed by Compressor OEM in the Download section of our web site. We have also including a listing of Mann-Filters, where we are one of the few Industrial Distributors in the US.] The Catalog is a PDF so it is easy to search with your computer, Email or Call us for Pricing.

Over the last 5 years, many of our costs have increased. At Independent Components Corp. we strive to keep our selling prices as complete as possible without sacrificing the quality of the parts we sell. Therefore, many of our selling prices have increased since we last printed a catalog February 2011. Price changes are effective October 17, 2016. We will do our best to hold the printed selling prices, but prices are subject to change without notice.

We would like to remind you that we have the capability to manufacture non-metal gaskets without hard tooling. This means that if you can draw it, or send us a sample, we can manufacture gaskets at our usual economic prices, usually in a day or less. Many customers have utilized this service already so they don't need to cut gaskets for special applications. We have already set up many gaskets used on rotary screw compressors. Give us a list of gaskets you need, we probably already know most or all of them.

Effective immediately, our lubricant and other chemicals are labeled with GHS compliant labels. All labels are **Customized with Your Company Information**, in color, at no additional cost to you. If you have any questions about this service, please call or email.

Quincy Compressor has implemented some design changes to their valve assemblies. Our VAL-1S-B-Q & VAL-1D-B-Q (Quincy 4610X3 and 1553X11) now has a 0.059" thick stainless valve disc like Quincy is now using. All of our Head Overhaul, Tune Up Kits and Major Overhaul kits contain the new valve disc. Additionally, our VAL-3D-B-Q (Quincy 7271X04) uses SPG-8D-Q (Quincy 7270-2). All of our Head Overhaul, Tune Up Kits and Major Overhaul Kits contain both SPG-8-Q (Quincy 7270) and SPG-8D-Q (Quincy 7270-2) for each discharge valve to be rebuilt. When performing the valve rebuild use the appropriate spring for the discharge valve. Our Valve Set Kits, contain the older style valve assemblies with a center bolt. If you want the kits with the new press-fit style, please clearly note it on your purchase order. The selling price will automatically adjust for the change.

INDEPENDENT COMPONENTS CORP.

528 Hempstead Turnpike, West Hempstead, NY 11552 • Phone 516-481-5100 FAX 516-481-5550

Champion has in recent years changed suppliers of the valves for R40, R70, PL40 and PL70. In the 1990's Champion redesigned the internals of the valve assemblies, and again in the 2010's. Our kits currently contain all valve internal parts for the pre-2010's version. We are working on making more universal kits. Until we can make universal kits, we recommend purchasing Valve Set kits (VSHOK & VSTUK). Champion does not sell internals for these valves.

We are now able to email UPS shipping notifications; this provides you with the tracking number and confirmation that your order has shipped. We can also email or fax your invoices providing you with confirmation of what were shipped and freight charges, these are sent the next business morning. If you want to take advantage of either of these services, please give us the appropriate email addresses and/or fax phone numbers.

To download our catalog (pdf format), please press the link in the email you have received or go to our website. We only allow our customers to download the priced catalog from the website, so you will need to register before downloading. Please check our website regularly for news about new products or services.

To find a section in the catalog when using Adobe Reader, click on the Bookmarks Tab on the left (or under the View Menu go to Navigation Panels: Bookmarks).

To search for an ICC or OEM part number, press "Ctrl-F" on your keyboard, type all or part of the Part Number and hit enter.

**Best Regards,
Independent Components Corp.**

OUR WARRANTY

INDEPENDENT COMPONENTS CORP. WARRANTS ITS PRODUCTS TO BE OF BETTER OR EQUAL QUALITY AND TOLERANCE THAN THOSE OF THE ORIGINAL MANUFACTURER AND TO BE FREE OF DEFECTIVE WORKMANSHIP OR MATERIAL. THE WARRANTY IS LIMITED TO EITHER THE REPLACEMENT OF THE PART OR REFUND OF THE AMOUNT PAID FOR THE PART.

INDEPENDENT COMPONENTS CORP. PRODUCTS MUST BE SATISFACTORY OR YOUR MONEY BACK.

OUR POLICY

TERMS: *Customers with Approved Credit :*

1% – 15 Days, Net 30 (US Dollars), F.O.B., Shipping Point.

Or COD Company Check or Credit Card (Master Charge, Visa or Discover)

1.5% Per Month Service Charge on Invoices Not Paid within 30 Days of Invoice Date

Customers with our Credit Application on file with ICC

COD - Company Check or Credit Card (Master Charge, Visa or Discover)

All Customers:

We will pass on our Bank's Charge on ALL Checks Returned.

MINIMUMS: There is no minimum order. However, all orders under \$50 are subject to a \$5 handling fee.

We would prefer to ship your parts on open account. To qualify, please fill out, sign, and return, the Credit Application on the next page. After receiving your Credit Application, we usually will ship COD Company Check. Upon receipt of favorable credit verification from your references we will be happy to ship on open account.

When ordering, please give complete and accurate part numbers. If material must be returned please call for a Return Authorization Number (RMA). NO RETURNS WILL BE ACCEPTED WITHOUT A RETURN AUTHORIZATION NUMBER. Any returns received without a RMA will be subject to a 5% additional charge. All items returned for credit within 60 days of invoice (except defective parts) will be subject to 15% restocking charge and must be securely packed to avoid shipping damage. Items returned after 60 days from invoice date may be subject to higher restocking charges. No credit will be issued for parts damaged in return transit. All material claimed defective must be returned for inspection with a written description of the problem. Do not return to the Post Office Box. Please ship to our Hempstead Turnpike address above.

We have the right to charge a fee for Credit Card transactions. We will not charge without your prior knowledge.

Cancellation of orders for non stock items will be accepted only if the buyer agrees to pay Independent Components Corp.'s cost up to the date of cancellation. Cancellation of stock items, once shipped will be subject to a 15% restocking charge in addition to any prepaid freight. In the event delivery is refused for any reason except damage, the buyer will be liable for prepaid freight, and subject to a 15% restocking charge if the order is canceled.

All claims for material shortages or damages in shipment must be made within 5 working days after receipt of shipment. If you suspect a shortage, carefully check the packing and contents of all boxes and kits. When a shipment is received damaged, all shipping material must be saved at the receiving location for inspection by the freight carrier. Please accurately weigh the package. If all material is not saved, an insurance claim can not be made. We will not be responsible for the damage if this procedure is not followed. Note is often useful to take digital photographs of the damage immediately to document damage claims.

We make every effort to show the Original Equipment Manufacturer's list prices as accurately as possible at the time of printing. However, due to frequent changes, these prices should be used for reference only.

ALL I.C.C. PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

ALL ORDERS WILL BE BILLED AT THE CURRENT SELLING PRICE WHEN SHIPPED.

The information in this catalog is, to the best of our knowledge accurate, but all recommendations or suggestions in this catalog (including but not limited to part number, serial number and model numbers) are made without guarantee.

As our catalog grows with new items, we will be sending additional price sheets to you. If there are parts you use in quantity, send samples or prints. We will be happy to quote. We are always looking for new items. Please give us your suggestions.

Independent Components Corp. Is an independent supplier of compressor replacement parts and is not affiliated with manufacturers mentioned in this catalog. The original manufacturers product description and/or part number is given for reference only.

INGERSOLL – RAND TYPE – 30

INFORMATION ABOUT INDEPENDENT COMPONENTS TYPE-30 KITS

We have assembled many types of kits to simplify ordering repair parts:

MAJOR OVERHAUL KITS (MOK) (Page IR-5) To replace most wearing parts

- **MAJOR OVERHAUL KITS** have been assembled which include connecting rods, crankpin bushings and main bearings, plus all items in the Tune Up Kit to repair one Type 30 Compressor.
- These kits are equivalent to the IR Step Saver Kits I + II + III + IV.
- Small compressor kits are available with either Aluminum or Bronze connecting rods. These are designated with the letters A or B.
- To order kits with old style filter pads (instead of filter elements), please add the letter "P" to the kit part number. Kits for vacuum pumps do not contain filters.
- Gasket sets for finger valve compressors in Major Overhaul Kits contain Flexible Graphite gaskets as required. Kits with green Compressed Non-Asbestos gaskets instead of Flexible Graphite also available at a lower cost, please call.
- Note our kits do not contain shaft seal repair kits, if needed please order from page IR-13

VALVE SET MAJOR OVERHAUL KITS (VSMOK) (Page IR-5) have been assembled that includes all parts in MOK's, with complete Replacement Valve Assemblies instead of Wearing Valve Parts.

TUNE UP KITS (TUK) (Page IR-6) To replace wearing parts in the head and cylinder

- **TUNE UP KITS** have been assembled which include Gasket Kit, Piston Ring Kit, oil seal, and wearing valve parts to recondition one Type 30 Compressor.
- To order kits with old style filter pads (instead of filter elements), please add the letter "P" to the kit part number. Kits for vacuum pumps do not contain filters.
- These kits are equivalent to the IR Step Saver Kits I + II + III. Note our kits do not contain shaft seal repair kits, if needed please order from page IR-13
- Tune up kits for finger valve compressors are available with either Flexible Graphite gaskets, as required (note the letter "G" after the model, except models 2340, 2420, 2475 and 2545 only are available with Flexible Graphite gaskets) or with green Compressed Non-Asbestos gaskets.

VALVE SET TUNE UP KITS (VSTUK) (Page IR-6) have been assembled that includes all parts in TUK's, with complete Replacement Valve Assemblies instead of Wearing Valve Parts.

HEAD OVERHAUL KITS (HOK) (Page IR-7) To replace wearing parts in the head only

- **HEAD OVERHAUL KITS** have been assembled with all necessary gaskets, "O" rings, and wearing valve parts to recondition the entire head for one Type 30 Compressor.
- To order kits with old style filter pads (instead of filter elements), please add the letter "P" to the kit part number. To order kits with old style filter pads, please add the letter "P" to the kit part number. Kits for vacuum pumps do not contain filters.
- These kits are equivalent to the IR Step Saver Kits I + II.
- Head overhaul kits for finger valve compressors are available with either Flexible Graphite gaskets as required (note the letter "G" after the model, except models 2340, 2420, 2475 and 2545 only are available with Flexible Graphite gaskets) or with green Compressed Non-Asbestos gaskets.

VALVE SET HEAD OVERHAUL KITS (VSHOK) (Page IR-7) have been assembled that includes all parts in HOK's, with complete Replacement Valve Assemblies instead of Wearing Valve Parts.

PISTON RING KITS (Page IR-10) Sets of piston rings are assembled and packaged separately for each piston.

GASKET KITS (Page IR-9) Some gasket kits for finger valve compressors are assembled two ways: Either with Flexible Graphite gaskets, sometimes referred to as Graphoil, the material used by the OEM (note the letter "G" after the model, except models 2340, 2420, 2475 and 2545 only are available with Flexible Graphite gaskets); Or Green Compressed Non-Asbestos material. Note usually only certain gaskets found in the air head are Flexible Graphite, other gaskets are made of the appropriate gasket materials.

Note ICC MOK's for Finger Valve Compressors use the Flexible Graphite Gasket kits (if available). ICC TUK's and HOK's are available with either type Gasket Kit.

INGERSOLL RAND STYLE OVERHAUL KITS (Page IR-7 to IR-8) These kits are assembled with the same components as the OEM kits to the best of our knowledge. Often the OEM modifies the contents and/or change part numbers. We do our best to keep up. Please note that kits for the finger valve compressors use Green Compressed Non-Asbestos material except the kits marked with †, that contain Flexible Graphite gaskets as required. Also, these kits do not contain shaft repair sleeves; they can be purchased on page IR-13

CRANKSHAFT REPAIR KITS (Page IR-13) To repair crankshafts that have a groove worn in them from Viton oil seals.

See IR-Index for Pricing by Page Number and a Complete List by IR OEM Number

Full money back Guarantee if not satisfied

Kits may be available for other similar compressors. Please call for details.

Unloader Piston Rings – TYPE 40

12A18CA131 (X1244T3).....37803210 PR-T3-IR

Unloader Pistons, Plungers, Valve Cages and Valve Crabs See Index

TYPE 40 TUNE UP KITS TUK's Contains channel and springs sets for all valves, unloader springs, unloader piston rings (LP unloader parts only - if the compressor has HP unloader piston, please order unloader piston rings and springs separately), complete gasket set, all piston ring kits, connecting rod bearings and oil seals. If valve guides are required, please order separately. Note all parts in these kits are available individually, please FAX or call for information.

TYPE 40 HEAD OVERHAUL KITS HOK's Contains channel and springs sets for all valves, unloader springs, unloader piston rings (LP unloader parts only - if the compressor has HP unloader piston, please order unloader piston rings and springs separately), valve seat gaskets, and valve cover gaskets, unloader cover gaskets and nut gaskets. If valve guides are required, please order separately.

------------------------	--------------------	------------------------	--------------------

VALVE SETS VSET's If you need a **VSET**, please order the appropriate **VSHOK** (pages 12-14). This will give the equivalent of a **VSET**, plus the Gaskets and Diaphragms needed for the Head. Due to the many combinations of Quincy Valves used in different models and records of change, we have not put together separate **VSETS**.

♦ Note: Valve Spring 7270 (**SPG-8-Q**) is the current style spring for Suction Valves, non-Press Fit and early Press Fit Discharge valves. In November 2003 Quincy redesigned the 7271X series Discharge Valve to use a longer spring 7270-2 (**SPG-8D-Q**). Kits listed in this catalog **now** contain both the **SPG-8-Q** and the New spring (7270-2) **SPG-8D-Q** for Discharge Valves and the **SPG-8-Q** for Suction Valves. We also stock the pre 1990's version of the 7270 which we call **SPG-15-Q**

QUINCY

MAJOR OVERHAUL KITS MOK's with Wearing Valve Parts. These kits are based on Quincy Style Overhaul kits on page QU-15. To simplify ordering parts for single machine repair, Quincy style Overhaul Kits MOK's have been assembled which include Gasket Kit, shims, Piston Pins (lock rings if used), Piston Ring Kit, Piston Pin Bushings, Insert Bearings (if used in original rods), Main Bearings, valve discs, springs, o-rings, oil seal and unloader diaphragms if required, to recondition one compressor. Kits for non-Vacuum pumps include a Solberg style air filter. Kits marked with a Ø include an oil filter element.

VALVE SET MAJOR OVERHAUL KITS VSMOK's with Complete Replacement Valves.

VSMOK's have been assembled which include all parts in MOK's, with Complete Replacement Valves instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required. Center Screw (old style) Discharge Valves are used in VSMOK's. Press Fit Discharge Valves are available upon request at the same cost.

IMPORTANT PISTON RING NOTES: Quincy has used two styles of Piston Rings on these machines. Most of the old machines were sold with Taper Faced Compression Rings, the newer machines were sold with Side Sealed Compression Rings. Side Sealed rings do a better job, especially on a worn cylinder. We are now including them as standard in all kits (unless noted). However, Taper Face rings are easier to install, and we are offering them as an option on most of the kits. Insert the letter "T" before the "Q" in the MOK part number for Taper Face rings.

Kits marked with a "B" are available with Oversize Rings Taper Face- please call

UNDERSIZE BEARING KITS If you want any of the kits assembled with Undersize Bearings, insert the letter "U" before the "Q" in the MOK part number for .010 Undersize Bearings, or insert the letter "W" before the "Q" for .020 Undersize Bearings.

QUINCY

TUNE UP KITS TUK's with Wearing Valve Parts. & Standard Size Piston Rings

To simplify ordering parts for single machine repair, TUK's have been assembled which include Gasket Kit, shims, Piston Ring Kit, insert bearings (if used in original rods), valve discs, springs, o-rings, oil seal and unloader diaphragms if required, to recondition one compressor. Please order the correct filter element in the listing the AIR & OIL FILTER Section.

VALVE SET TUNE UP KITS VSTUK's with Complete Replacement Valves.

VSTUK's have been assembled which include all parts in TUK's, with Complete Replacement Valves (current style) instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required. Center Screw (old style) Discharge Valves are used in VSTUK's. Press Fit Discharge Valves are available upon request at the same cost.

IMPORTANT PISTON RING NOTES: Quincy has used two styles of Piston Rings on these machines. Most of the old machines were sold with Taper Faced Compression Rings, the newer machines were sold with Side Sealed Compression Rings. Side Sealed rings do a better job, especially on a worn cylinder. We are now including them as standard in all kits (unless noted). However, Taper Face rings are easier to install, and we are offering them as an option on most of the kits. Insert the letter "T" before the "Q" in the TUK part number for Taper Face rings.

Kits marked with a "B" are available with Oversize Rings Taper Face— please call

UNDERSIZE BEARING KITS If you want any of the kits assembled with Undersize Bearings, insert the letter "U" before the "Q" in the TUK part number for .010 Undersize Bearings, or insert the letter "W" before the "Q" for .020 Undersize Bearings.

HEAD OVERHAUL KITS *HOK's* with *Wearing Valve Parts*.

To simplify ordering parts for single machine valve and cylinder head repair, HEAD OVERHAUL KITS have been assembled with all necessary valve discs, valve springs, unloader diaphragms if required, valve seat gaskets, valve cover gaskets, and head gaskets to recondition valves for one compressor. Please order the correct filter element from the listing in the AIR & OIL FILTER Section.

VALVE SET HEAD OVERHAUL KITS *VSHOK's* with *Complete Replacement Valves*.

VSHOK's have been assembled which include all parts in HOK's, with Complete Replacement Valves (current style) instead of Wearing Valve Parts. Unloader kickoff pins & springs are also included, if required. Center Screw (old style) Discharge Valves are used in VSHOK's. Press Fit Discharge Valves are available upon request at the same cost.

LE ROI DRESSER – WESTINGHOUSE

WESTINGHOUSE TUNE UP KITS TUK's with Wearing Valve Parts. To simplify ordering parts for single machine repair, **TUNE UP KITS** have been assembled which include gasket kit with oil seal, piston ring kit, intake filter pads, except as noted, valve discs and springs to recondition one YC, YS or G compressor.

VALVE SET TUNE UP KITS VSTUK's with Complete Replacement Valves. **VSTUK's** have been assembled which include all parts in **TUK's**, with Complete Replacement Valves instead of Wearing Valve Parts. For compressors with suction unloading valves order the **LED VSTUK**. Order the **WE VSTUK** for Plain Suction Valves.

LE ROI DRESSER

TUNE UP KITS TUK's with Wearing Valve Parts - To simplify ordering parts for single machine repair, **TUNE UP KITS** have been assembled which include Gasket Kit with oil seal, Piston Ring Kit, Unloader Repair Kit, intake filter element, insert bearings, valve discs, springs and locating pins (for A machines), unloader felts and "O" rings, to recondition one compressor.

VALVE SET TUNE UP KITS VSTUK's with Complete Replacement Valves. **VSTUK's** have been assembled which include all parts in TUK's, with Complete Replacement Valves instead of Wearing Valve Parts. For compressors with suction unloading valves order the **LED VSTUK**. or **WE VSTUK** for Plain Suction Valves.

UNDERSIZE BEARING KITS If you want any of the kits assembled with Undersize Bearings, insert the letter "U" before the "LED" in the **TUK** or **VSTUK** part number for .010 Undersize bearings.

VALVE ASSEMBLIES – STEEL (With Gaskets)			
Note on HP Suction Valves for R10, R15, R30:			
Models R10-R10C, R15-R15A and R30-R30C use HP Suction valves (VAL 1S CH) the same size as the Discharge valves. Models R10D, R15B and R30D originally had HP Suction valves with Larger Seats than the older models so they could not be confused with the HP Discharge Valves. In 2002, the HP Suction Valve was changed to (VAL 1SC CH) which has a different Seat, Bumper, Disc, and Spring (changed from a coil spring, to a curved washer type spring).

CHAMPION

TUNE UP KITS *TUK's* & VALVE SET TUNE UP KITS *VSTUK's* To simplify ordering parts for single machine repair, TUNE UP KITS have been assembled which include gasket set, piston ring set, oil seal, air filter elements, and wearing valve parts to recondition one Compressor. **PL** kits include connecting rod inserts. **VSTUK's** have been assembled which include all parts in **TUK's**, with Complete Replacement Valves (current style) instead of wearing valve parts and for R-Series models **VSTUK's** include unloader springs. Kits for **R10, R15A** and **R30A, B & C** compressors contain both foam filter elements and pleated elements to fit all intake assemblies.

VALVE NOTES for R10, R15, PL15, R30D & PL30: In 1990 Champion redesigned the HP suction valves used on R10, R15 and R30 compressors. The change was to increase the diameter of the valve seat by 1/8" (**R10D, R15B & R30D**) The valve internals did not change. This change was made to prevent confusing the HP Suction and Discharge Valves.

In 2002 Champion again redesigned the internals of the HP suction valves changing from a coil spring to a curved washer type spring and a different valve disc.

- If you are repairing a compressor with the old coil spring then order the kit with no letter after the model number.
- If you are repairing a compressor with the new curved washer type spring then order the kit with **N** after the model number.
- If you are not sure which you have, order the kit with **Z** after the model, this has parts for both old and new design valves.

All of our **VSTUK's** for models **R10D, R15B, R30D & PL30** have HP suction valves with the new design springs and plates.

VALVE NOTES for R40, PL40, R70 & PL70: In the 1990's Champion redesigned the internals of the valve assemblies, and again in the 2010's. Our **TUK's** currently contain all valve internal parts including locating pins and guide ring and lock nuts for pre-2010's version ONLY. We are working on making a more universal **TUK**. Order a **VSTUK** if you are not sure what you have.

PISTON RING NOTES: In 1998 Champion redesigned the piston ring kits for all R-Series models changing from 4 piston rings per piston to 3 piston rings per piston. All of our **TUK's** and **VSTUK's** for R15, R30, R40 and R70 series kits contain piston rings for both designs.

FILTER SILENCERS ASSEMBLIES

We offer the standard filter silencer with metal hoods (FS type) or for more quiet with a lexan® plastic hood (SF type). Both silencers have all metal bases and tubes. The lexan® hood is quieter because of improved seal against the base of the unit

Safety & Check Valves

I.C.C. PART NO.

I.C.C. PART NO.

Kingston A.S.M.E. High Capacity Safety Valve The Kingston 710 side outlet safety valve. High flow capacities are achieved through full-lift design. Lever for manual testing. Fully guided stem provides superior re-seating accuracy. Soft seat design, stock valves use silicone seats, other materials also available. Inlet from 1/2" to 1", outlet 3/4 or 1" Available pressure setting up to 400 psig. Settings and CFMs follow:

SV-710-1/2 x 3/4x PSIG	1/2" MPT inlet, 3/4" outlet
SV-710-3/4 x 3/4 x PSIG	3/4" MPT inlet, 3/4" outlet
SV-710-1/2 x 1 x PSIG	1/2" MPT inlet, 1" outlet
SV-710-3/4 x 1 x PSIG	3/4" MPT inlet, 1" outlet
SV-710-1 x 1 x PSIG	1" MPT inlet, 1" outlet

135	358	200	516
150	395	300	758

Kingston A.S.M.E. High Capacity Safety Valve The Kingston 118CSS high capacity safety valve is precision machined brass valve with a hard seat. It features a stainless steel ball and a pull ring for manual testing. This valve is approved in Massachusetts and Washington DC and is stamped with UV & NB symbols. Registered in all Canadian provinces. 400°F max temperature. Available in 1/4", 3/8", 1/2", 3/4" and 1" inlet sizes. Settings and CFMs follow:

SV-118-1/4 x PSIG		1/4" MPT inlet	
PSIG	CFM	PSIG	CFM

Conrader Series SRV A.S.M.E. Safety Valves with Soft Seat and Pull Ring High capacity design. All brass construction with zinc-plated music wire spring. Resilient silicone rubber pad insures valve is bubble tight to within 10% of set pressure. Stamped with "UV" and "NB" symbols. Available set pressures range 25 psi to 250 psi. Set pressure tolerance 3% of set pressure. 250°F max temperature. 1/8" valve is 1.91" tall, the 1/4" valve is 2.10" tall. Settings and CFMs follow:

Most Check valves and Pilot valves are available with British Standard Pipe Threads – Please Call

Inline Check Valve Brass construction, two-piece design with glass filled Teflon disc and a stainless steel spring. Our check valves have a triple balanced flow design for minimum restrictions. The ICV series is Female NPT Inlet and Female NPT Outlet. The ICVP adds a 1/8" NPT port. The ICCV is a control line check valve that uses an elastomer poppet for low flow applications; this has a Female NPT Inlet and Male NPT Outlet. Maximum working pressure 500 PSIG, maximum operating temperature 450°F.

The ICCV is a control line check valve that uses an elastomer poppet for low flow applications.

Kingston 205 Horizontal Anti-Hammering Check Valve with Unloader Port.

Spring loaded Dash Pot check valves are designed to reduce the hammering effect caused by exhaust pulsation found in reciprocating air compressors. Has a 1/8" NPT Unloader port with plug. Brass construction, with a 25% glass filled Teflon disc and Stainless Steel spring. Maximum working pressure 400 PSIG, Cracking Pressure 1-3 psi, maximum operating temperature 350°F. Lubricated compressed air applications only. Repair kits are available.

Air Activated Tank Drain Valve. Automatically removes the water and condensates that collect in the tank. It is designed for compressors having bleeder or pressure type unloaders. Complete drainage is assured by double action of the valve which opens when the compressor starts and stops. Designed for compressors up to 5HP maximum operating pressure 300 psig. Call or fax for installation instructions.

Check Valves & Accessory Valves

Air Operated Discharge Unloader Valves. The discharge unloader valve is used in constant speed applications where intake unloaders are not present. It is controlled by a pilot valve that signals the normally closed valve to open at the unloaded pressure. When open, the discharge valve vents discharge line air to atmosphere. When pressure drops to load pressure, the pilot valve closes the discharge valve and the compressor returns to normal operation. Brass Body rated at 250 psig, 550° F. Contains stainless steel spring and Teflon piston

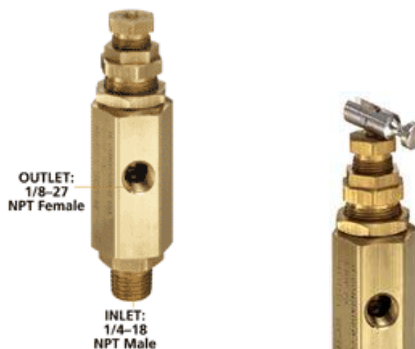

Inlet	Outlet	Pilot	ICC PART NO.
1/2	1/2	1/4 F	DUV-1/2

Unloader Pilot Valve. Pilot Valves are used where the compressor is to maintain a constant pressure range while running continuously. Pilot valves operate in a set pressure range. The Pilot Valve operates within a range, at the unload setting, the pilot valve opens to activate another device; at the load setting, the pilot valve closes.

Inlet 1/4" NPT Male, Outlet 1/8" NPT Female

Control Valves

Blow Down Valves

Normally Closed Air Actuated On-Off Valve

Installed downstream from the air-oil separator, the Blow Down Valve provides two functions:

- At Start-up, the valve closes to permit the air-oil separator pressure to build up.
- At Shut-down, when a pressure is applied, the valve opens to bleed the air-oil separator to atmosphere.

The Blow Down Valve may also be used as a By-Pass Valve to bleed air through the compressor at start-up. Manufactured with Teflon seats for long life and Viton™ o-rings for lubricant compatibility.

Valve Port Size NPT	I.C.C. PART NUMBER
1/4"	BDVAL-1/4
1/2"	BDVAL-1/2

Minimum Pressure Check Valves

Combination Back Pressure & Check Valve

Installed directly downstream from the air-oil separator, the Minimum Pressure Check Valve provides two functions:

- At start-up, the valve stays closed up to a preset level and then opens to maintain a minimum pressure in the air-oil separator. This assures pressure for lubricating the compressor, reduces oil foaming and protects the air-oil separator element.
- At shut-down, the valve closes to prevent back flow through the compressor.

Design Features:

- Flow passages designed for low pressure drop
- Teflon seats for tight seal
- Viton™ o-rings for lubricant compatibility
- Cast Iron Housings
- Pressure to 350 psi
- Flow to 1500 scfm

These valves are available in various configurations ranging from 3/4" NPT to 3" NPT with and without inlet or outlet ports. **Please call for more information**

Control Regulators

Positive Control Regulators

Normally Closed Modulating Control Valve.

Positive Control Regulators are used to modulate the intake valve and other system valves to control compressor output. Installed to sense compressor output pressure. This regulator valve stays closed up to a preset pressure and then modulates open to provide a positive control signal as compressor pressure increases.

- Stainless Steel seats
- Viton™ Diaphragm
- Threaded Stem for panel mounting
- 200 psi operating pressure

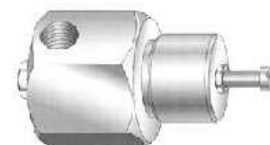

Negative Control Regulators

Normally Open Modulating Control Valve.

Negative control regulators are used to modulate normally closed intake valve and other system valves to control compressor output. Installed to sense compressor output pressure. This regulator stays open to a preset pressure and then modulates closed to provide a negative control signal as compressor pressure increases.

- Stainless Steel seats
- Viton™ Diaphragm
- Threaded Stem for panel mounting
- 200 psi operating pressure

Regulator Type	I.C.C. PART NUMBER
Positive	RVAL-P-D1
Negative	RVAL-N1

Drain Valves

ICC DRAIN VALVES – Are high quality and price competitive systems that offers a cost effective means of removing condensate from compressors, receivers, after coolers, filters, drip legs and dryers.

ELECTRONIC DRAIN VALVES – (MDV's & EDV's) Are ideal where power is easily available. We stock sizes ranging from 1" Motorized Ball Valves with a 12mm orifice for large tanks and applications with a lot of debris, to 1/8" with a 2mm orifice for Filters and small compressors. All standard MDV's & EDV's are for 115VAC with 6 foot cord & plug, see chart for other available options.

Non-ELECTRONIC DRAIN VALVES – (DV's) Are the best choice where electricity is not easily available or reliable, or NEMA 6 requirements must be met. They all have *Zero Air Loss* when draining.

EDVP – Premium Electronic Drain Valves that do not need a strainer. Has a 4.5mm orifice & 2 year warranty. Common configurations:

I.C.C. PART	NPT	Voltage
EDVP-1/4	1/4	115vac
EDVP-1/4-24VDC	1/4	24vdc
EDVP-1/4-230V	1/4	230vac
EDVP-3/8	3/8	115vac
EDVP-1/2	1/2	115vac
EDVP-1/2-230V	1/2	230vac
EDVP-1/2-SS	1/2	115vac
Stainless Valve		

EDVGS – General Purpose Drain Valves with Strainer attached. Has a 4.0mm orifice & 1 year warranty. Common configurations:

I.C.C. PART	NPT	Voltage
EDVGS-1/4	1/4	115vac
EDVGS-1/4-230V	1/4	230vac
EDVGS-3/8	3/8	115vac
EDVGS-1/2	1/2	115vac
EDVGS-1/2-230V	1/2	230vac

EDVC – Combination Electronic Drain Valve & Strainer set
4.0mm orifice & 1 year warranty. Only available in 1/2 inch size

I.C.C. PART	NPT	Voltage
EDVC-1/2	1/2	115vac

EDV – Small Electronic Drain for Filters and small units. Has 2mm orifice.

I.C.C. PART	NPT	Voltage
EDV-1/8	1/8	115vac

DVP – Premium Non-Electronic Drain Valves. *Zero Loss* medium size with an integral strainer and test button. Has Inlet ports on the top and side

I.C.C. PART	NPT
DVP-1/2	1/2

DVG – General Purpose Non-Electronic Drain. *Zero Loss* Valves for Filters small units. Inlet ports on the top. Larger versions with a side inlet port also available

I.C.C. PART	NPT
DVG-1/2	1/2

Smart Guard – Large Electronic *Zero Air Loss* Drain Valve. Has multiple inlet ports and optional heater for cold areas. High Pressure version available.

I.C.C. PART	NPT	Voltage
EDVC-1/2	1/2	115vac

MDV – Motorized Drain Valve. An uncloggable Ball Valve for difficult applications with high condensate flows and heavy particulate loads. It is a High Pressure valve with a 12mm orifice and has 9 pre-set programs and battery backup which closes the valve during a power outage.

I.C.C. PART	NPT	Voltage
MDV-1/2	1/2	115vac
MDV-1/2-230V	1/2	230vac
MDV-3/4	3/4	115vac
MDV-1	1	115vac

Drain Valve L-Strainers with Ball Valve. – Are not required for normal condensate drainage with orifices over 3.5 mm. However, most people use the Strainer Valve both as a shut off valve, allowing the to the Drain Valve to be serviced with pressure in the line, and to reduce the service needed for the Drain Valve. Rated at 400 psig with Stainless Steel Strainer. Chrome plated or larger Brass version with larger screen. 1200 psig version available.

Energy Loss & Environmental Equipment

ASV – Timer Controlled Air Saver Valve. All air lines have some leakage. Reduce Factory Air Loss with our ASV - with a 7 day programmable timer to turn off either at the tank or in the air lines to parts of the building where and when it is not needed – Nights, Weekends etc. 230 psig 1" or 2" NPT Inlet & Outlet, Nickel Plated Brass Ball valve with Stainless Steel Ball and Viton Seals. 33 to 140 degrees F ambient temperature (33-212 air temperature in pipe). 115 or 230 VAC NEMA 12. Manual override and optional remote control.

I.C.C. PART	NPT	Voltage
ASV-1	1/2	115vac
ASV-2	1/2	115vac

Ultrasonic Air Leak Detector. Small air leaks can cause thousands of dollars per year in wasted energy. Leaks cause a compressed air system to lose pressure increasing compressor run time and increasing your power costs. The Leak Detector is designed to work in noisy environments for quick and easy detection of air leaks up to 33 feet away with both visual and audible indication. Great for both Audits and regular preventative maintenance

I.C.C. PART	Voltage
UALD	9v battery

Condensate Separators – A 25HP Air Compressor can generate 20 gallons of Oil Contaminated condensate per day. This is considered hazardous waste and in most places it is prohibited to dump this down the drain. However, it is almost 99% Water so a Condensate Separator can reduce this down to 5 gallons per week. Using a High Performance Filter Element followed by a Carbon Element an oil carryover of less than 10 ppm can be achieved. No power is needed. 1/2 NPT Inlet & Outlet connections. Replacement filters available.

Ball Valves & Pressure Gauges

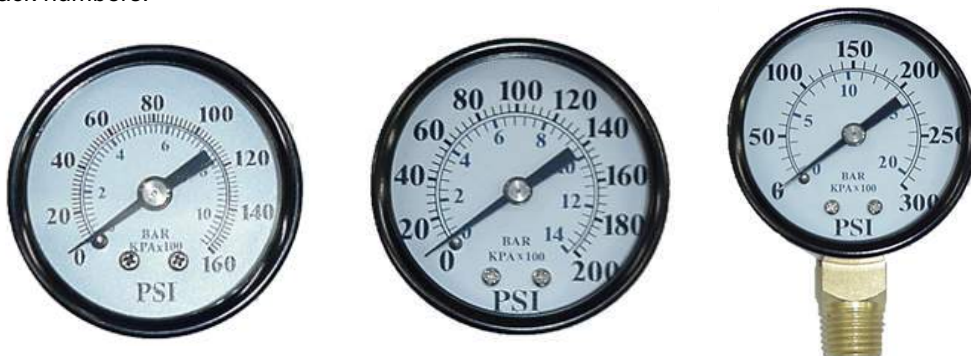

Ball Valve. Ball valves are made of forged brass and use a nickel plated brass stem. A simple quarter turn of the handle allows the user to control the chrome plated brass ball to open and close the valve. Full port design used for air, water, oil or inert gases. Maximum operating pressure 600 W.O.G., Maximum temp 366°F, Female to Female NPT fittings.

AUTOMUFFLERS®

Allied Witan Autoufflers® typically reduce noise level by 17-25 dB. (A 20 dB reduction decreases sound energy by a factor of 100.) We normally stock them with Male NPT thread, but are available with Male BSPT or Female NPS thread. We stock most sizes of Air Exhaust Mufflers and Air Dryer Mufflers. All varieties and sizes of Automufflers are available including: Relief Valve Mufflers, Steam Exhaust Mufflers, Vacuum Pump Exhaust Mufflers, etc.

ACTIVATED ALUMINA DESICCANT

ICC Activated Alumina desiccant is an excellent all purpose desiccant for drying air and most other gases. Activated Alumina is designed to be used in both heated and heatless dryers. Dewpoints of up to -100°F can be achieved. Activated Alumina can be regenerated to its original adsorption capacity. It has a high resistance to shock and abrasion.

Chemical Analysis of ICC Activated Alumina Desiccant (Typical)

Constituents	Weight %
Soda Na ₂ O	0.500
Fe (Fe ₂ O ₃)	0.015
Si (SiO ₂)	0.020
Ti (TiC ₂)	0.002
Loss on ignition	5-7

Physical Properties of ICC Activated Alumina Desiccant (Typical)

Bulk Density (g/cm ³)	0.82
BET Area (m ² /g)	300 - 360
Pore Volume (cm ³ /g)	0.44
Crush Strength (kg)	0.020
1/8 Bead	13.6 - 22.7
1/4 Bead	18.1 - 45.4

Packing is usually in 50-pound bags (easy to ship, handle, & store).
 Other packing is available upon request.

GASKET MATERIAL

Independent Components Corp. has an extensive stock of gasket material. We stock premium quality materials.

We manufacture most of our non-metallic gaskets. We can make custom gaskets by sample, drawing or dimensions. **No gasket job is too small!**

GKM-700 – Compressed Non Asbestos Sheet with NBR Binder – Green 60" x 60" Sheets

A high quality sheet manufactured with synthetic fibers (Aramid) and NBR binders. Recommended for use in sealing oils, solvents, fuels, non-aggressive solutions and service conditions up to 750° F

Equal to: Garlock® 2850, 2900, 3000, Klinger® C-4400, C-4401, C-4201

Thickness	I.C.C. PART NUMBER
1/64"	GKM-700-1/64-SH
1/32"	GKM-700-1/32-SH
1/16"	GKM-700-1/16-SH
3/32"	GKM-700-3/32-SH
1/8"	GKM-700-1/8-SH

GKM-BAF – Compressed Non Asbestos Sheet made of graphite and carbon fibers with NBR Binder – Black 60" x 60" Sheets

This High Temp compressed graphite and carbon fiber sheet with NBR binders is rated for 900°F. Ideal for high temperature applications. It can be cut light traditional gasket materials, yet has many of the advantages of flexible graphite (Graphoil).

Equal to Garlock® 9850, 9900, Klinger® C-4500

Thickness	I.C.C. PART NUMBER
1/32"	GKM-BAF-1/32-SH
1/16"	GKM-BAF-1/16-SH
1/8"	GKM-BAF-1/8-SH

GKM-CS301 – Cellulose Fiber – Light Brown – Sold by the linear foot, 40" wide

Interface Solutions, Inc. CS-301 is a good seal in water and oil. It is a blend of cellulose fibers in a synthetic rubber binder. Ideal for applications where a compressible material is required.

Thickness	I.C.C. PART NUMBER
1/32"	GKM-CS301-1/32-LF
1/16"	GKM-CS301-1/16-LF

GKM-GRAF – Flexible Graphite – Gray 39" x 39" Sheets

Industrial Grade homogeneous flexible graphite foil, carbon content (98% min), no resin binders or any other chemical fillers.

Equal to Graphoil® GTB, or Calagraph® B

Thickness	I.C.C. PART NUMBER
1/32"	GKM-GRAF-1/32-SH
1/16"	GKM-GRAF-1/16-SH

Note: A crate charge may apply to ship this material

GKM-GRAF-IN – Flexible Graphite with insert – Gray 39" x 39" Sheets

Industrial Grade homogeneous flexible graphite foil, carbon content (98% min), no resin binders or any other chemical fillers with stainless steel insert.

Equal to Graphoil® GHR, or Calagraph® BSSC

Thickness	I.C.C. PART NUMBER
1/32"	GKM-GRAFIN-1/32-SH
1/16"	GKM-GRAFIN-1/16-SH

Note: A crate change may apply to ship this material

GKM-GRAF-TNG – Flexible Graphite with Tang Insert – Gray 39" x 39" Sheets

Industrial Grade homogeneous flexible graphite foil, carbon content (98% min), no resin binders or any other chemical fillers with .004" thick perforated 316 stainless steel tang insert mechanically bond.

Equal to Graphoil® GHR, or Calagraph® BSSC

Thickness	I.C.C. PART NUMBER
1/16"	GKM-GRAF-TNG-1/16-SH
2mm	GKM-GRAF-TNG-2MM-SH

Note: A crate change may apply to ship this material

Other Gasket and Diaphragm materials are available – Please Call or Fax for Prices

O-RINGS (Sample prices)

O-Rings – are in stock in almost all standard sizes in Buna, Silicone and Viton. Sample pricing is listed below for about every 10 O-Ring sizes, if you need pricing on unlisted sizes, please FAX or Call us, and request a complete price list. To Order please ask for “ORING-sss-M”, where sss is the standard O-Ring Size, M, the material is B for Buna, S for Silicone or V for Viton.

For example order: **ORING-001-B**

Other Materials and Metric O-Rings are also available.
