- NOTE:**
- A** – Contains both new and old style valve springs.
  - N** – Contains new style valve springs.
  - S** – Contains steel oil rings.
  - U** – Contains .020 undersize bearings.
  - NU** – Contains new style valve springs, .020 undersize bearings.
  - SU** – Contains steel oil rings, .020 undersize bearings.

Sometime in the “early 70’s” Kellogg changed the internals of the valves used in the 352 & 462 low pressure and 360 & K25 high pressure valves. There is NO serial number reference for this change.

Old Style Spring

**SPG-3-KE** - suction  
**SPG-4-KE** - discharge

Current Style Spring

**SPG-7-KE** - both suction  
and discharge

The internals (except DISCs) are not interchangeable, so you must be careful to order the correct overhaul kit! The complete valves are the same size so that current valves can be used to replace old style valves. The valve part numbers did not change.

Old vs New Style Kellogg 38736 & 38737 Valve Assemblies

*Kits may be available for other similar compressors. please call for details.*
